Blameless review template

signal by Travis Loudin

After an incident, ask what let it happen, not who did it. People who fear blame hide information. This is the standard review from Fix the problem, not the blame: timeline, contributing causes and fixes.

TIMELINE

What happened, in order.

CONTRIBUTING CAUSES

What let it happen. Never a name in the root cause.

FIXES

What changes. Every fix has an owner and a date.
